### Role of citizen's monitoring in CF Management

RECOFTC – The Center for People and Forests 23 April 2018

#### FOREST IN ASIA AND THE PACIFIC

740 million hectares

## 18%

The world's forest in the region

Over 450 million local people in Asia and the Pacific rely on forest resources for their livelihoods

#### **COMMUNITY FORESTRY IN ASEAN**

THE CENTER

Total land area 435,405,300ha (100%)

(RECOFTC 2014)

#### **CURRENT COMMUNITY FOREST: STATUS V TARGETS**

4	Area covered by Official Agreements		-Target Area		% Achieved
Country	ha	% forest land	ha 💦 👬	Target Period	in 2013
Cambodia	183,725	1.80%	2 million	2010 - 2029	9%
Indonesia	143,065	0.11%	2.5 million	2011 - 2016	5%
Lao PDR	Not available	Not available	n/a	n/a	n/a
Malaysia	Not available	Not available	n/a	n/a	n/a
Myanmar	42,148	0.13%	919,000	2001 – 2030/31	4%
Philippines	4,128,212	26.12%	9 million	1997 - 2008	45%
Thailand	500,000	2.23%	n/a	n/a	n/a
Vietnam	3,809,320	25.08%	4 million	2006 - 2020	95%
Sum	8,806,470	3.50%	15,919,000		69%

THE CENTER FOR PEOPLE AND FORES

(from RECOFTC 2014)

## Citizen's monitoring and reporting

- Different from traditional approaches
- Actively engages key actors in setting objectives and indicators, and assessing outcomes
- Driven by local stakeholders
- Designed to provide more targeted and appropriate benefits to local communities

#### WHY COMMUNITY FORESTRY?

Putting local people at the heart of forest decision-making and management, community forestry can make sustainable forest management a reality.

> Community forestry is a solution for people and forests :

- improving livelihoods
- reducing deforestation
- good governance

## **Benefits of citizen monitoring**

- Cost effective
- Realistic and contextualized indicators
- Information access to local communities
- Realistic assessment of local changes, trends and resource availability
- Data ownership and intellectual property rights
- Recognition of local knowledge

## Challenges of citizen monitoring

- Capacity and resources with local stakeholders to collect and synthesize information
- Reliability and accuracy of data
- Lack of recognition by officials
- Monitoring and evaluation is a continuous process

## CF and global challenges

- Role of CF in climate change mitigation and adaptation
- Role of CF in local livelihoods
- Role of CF in meeting Sustainable Development Goals (SDGs)
- Role of CF in community empowerment and grassroots governance

Communities will be an ally in sustainable forest management and economic development if they can benefit from their efforts

# If the forest pays the forest stays!

# Thank you www.recoftc.org

Local people hold the key to healthy forests
