

Call for roster applications

RECOFTC Nepal is calling for experts to join its roster for various consultancy and collaborative work opportunities. This roster will serve as a pool of potential candidates for current and upcoming projects, events and initiatives.

RECOFTC is an international nonprofit organization working towards a future where resilient communities with respected rights thrive in forest landscapes that they manage sustainably and equitably. We take a long-term, landscape-based and inclusive approach in supporting local communities to secure their land and resource rights, stop deforestation, find alternative livelihoods and foster gender equality. With more than 37 years of experience, we have built trusting relationships with partners from communities, governments, businesses, academia and civil society organizations. Our innovations, knowledge and initiatives enable countries to foster good forest governance, mitigate and adapt to climate change and achieve the UN Global Goals.

We operate in the Asia-Pacific region, with country offices in Cambodia, Indonesia, Lao PDR, Myanmar, Nepal, Thailand and Viet Nam.

RECOFTC Nepal, with a significant presence in a country where forests cover nearly 45 per cent of the land, focuses on fostering resilient communities through sustainable and equitable forest management. Our approach is comprehensive and inclusive, aimed at securing resource use rights for local communities, advocating for gender equity and enhancing livelihoods through sustainable forest practices. With over 30 years of experience, RECOFTC Nepal has cultivated strong partnerships across various sectors, from local communities to global institutions, contributing to the country's efforts towards sustainable development. Our projects and expertise in community forestry and decentralized forest management are pivotal in strengthening community capacities and aligning with national sustainability goals.
